ABSTRACT

This publication provides historical data on enrollment, weekly student contact hours (WSCH), and average daily attendance (ADA) for the Los Angeles Community College District (LACCS) and for each college in the District. Detailed enrollment data by student category, ethnic group, and age are provided for the past 2 to 3 years. Less detailed enrollment data are available for 10 years; WSCH and ADA are available for 8 years. Four-year summer enrollment, WSCH, and ADA are also presented. Since the 1966-67 school year, total District enrollment has increased 72.4 percent in the fall and 71.5 percent in the spring. Day enrollment increases in both fall and spring have exceeded evening enrollment increases. The average age of LACCD students has experienced a continuous rise, while white students continue to decline as a percentage of the reporting student body. Nevertheless, white students still represent the largest ethnic group in the District. Student class loads for day students declined in 1975-76, while evening class loads increased. Total 1975-76 District ADA increased 10.3 percent over 1974-75. Appended to this document are enrollment figures for the District's Instructional Television program since its establishment in 1971. ABSTRACT

This publication provides historical data on enrollment, weekly student contact hours, and average daily attendance for the Los Angeles Community College District, and for each college in the District. Detailed enrollment data by student category, ethnic group, and age are provided for recent years. Less detailed enrollment data are available for ten years; weekly student contact hours (WSCH) and average daily attendance (ADA) are available for eight years. Four-year Summer enrollment, weekly student contact hours, and average daily attendance are also presented.

Total enrollment within the District once again reached record levels in Fall 1975 (137,031) and in Spring 1976 (133,692), representing increases of 9.8% and 4.2% over comparable 1974-75 figures. Summer enrollment increased 24.1% from the previous year.

Figures released by the American Council on Education reveal that community college enrollment nationwide increased 16.7% between Fall 1974 and Fall 1975, as compared to an 11.6% increase the previous year. Comparative enrollments at non-LACCD institutions in Los Angeles County show that their total growth was 15.2% in Fall 1975 and 7.6% in Spring 1976. Four-year institutions in the County showed smaller increases - 4.8% in Fall 1975 and 6.2% in Spring 1976.

Since the 1966-67 school year, total District enrollment has increased 72.4% in the Fall and 71.5% in the Spring. Day enrollment increases in both Fall (115.3%) and Spring (115.9%) have exceeded evening enrollment increases (29.2% and 27.5%, respectively). Since 1972, Summer enrollment has increased 38.9%. Contrary to the Fall and Spring District trends, gains in evening Summer enrollment (40.5%) have slightly outdistanced day enrollment increases (38.1%).

As has been the case in past years, the average age of LACCD students continued to rise in 1975-76. Average student age has increased from approximately 26 years in Fall 1973 to 29 years in Spring 1976. Students aged 25 years or older constituted 51.6% of all LACCD students in Fall 1975, compared to 44.9% in Fall 1973.

Ethnic data collected for Spring 1976 indicate that Other White (i.e., Caucasian) students continue to decline as a percentage of the reporting student body, although they still represent the largest ethnic group in the District (52.5%) Black/Negro (20.4%) and Spanish-Surnamed (18.0%) students were the District's second and third largest ethnic groups. Percentages of Oriental/Asian students (6.3%) and Native American students (1.2%) also increased from the previous Spring.

Continuing the trend of recent years, student class loads for day students declined in 1975-76 while evening class loads increased. The average day load was 11.71 hours in Fall 1975 and 11.89 hours in Spring 1976; comparable 1968-69 figures were 15.12 hours and 15.48 hours, respectively. Evening loads increased to 8.91 hours in Fall 1975 and 9.20 hours in Spring 1976.

Total 1975-76 District attendance ADA is estimated at 88,747, representing a 10.3% increase over 1974-75. Percentage increases between 1968-69 and 1974-75 were 40.5% for defined adult ADA, 31.0% for other-than-adult ADA, and 32.7% overall.

GLOSSARY

Average daily attendance (ADA) is a measure of attendance that is calculated from weekly student contact hours.* Attendance is calculated on a semester basis and is thus comparable to other measurements reported by semester. Apportionment ADA is calculated on an other-than-semester basis and is the figure used to determine State apportionment to the District. ADA is calculated differently for defined adult* than for other-than-adult* students.

Census day is a fixed date during a semester (usually Monday of the fourth week of classes) at which time counts of weekly student contact hours* and enrollment* are taken for State reporting purposes.

Continuing students at a college are students who were enrolled in the same college during the immediately preceding semester.

Day students are students who are taking one or more classes convening prior to 4:30 p.m.; the category thus includes students who are taking both day and evening classes.

Defined adult (DA) is a student who is 21 years of age or older and who is enrolled for fewer than 10 weekly student contact hours.*

Enrollment is a "head-count" of the total number of students in a college or District; enrollment, unlike ADA, does not reflect the number of weekly student contact hours* for which students are enrolled.

Ethnic status refers to racial affiliation as reported by students on a voluntary basis at the time of registration.

Evening students are students who are enrolled exclusively in classes convening at 4:30 p.m. or later.

First-time students at a college are students who were not enrolled in the college during the immediately preceding semester; the term includes both freshmen and transfers and also students returning to the college after an absence.

Freshmen are students who at the time of registration have completed fewer than 30 semester units of college credits.

Full-time students are enrolled for 12 or more units during a semester.

Other-than-adult (OTA) students are under 21 years of age or enrolled for 10 or more weekly student contact hours.*

Part-time students carry less than 12 units.

Sophomores are students who, at the time of registration, have completed 30 or more semester units of college credit.

Weekly student contact hours (WSCH) are derived my multiplying the number of students enrolled in a class by the number of hours per week for which the class meets. A class with 10 students which meets three times a week would thus generate 3 x 10 or 30 WSCH.

DISTRICT PROFILE

Two-Year Enrollment Comparison

Enrollment data for the District and for each of its nine colleges for the Summer, Fall, and Spring semesters of the past two academic years are presented on page 7. District enrollment once again reached record levels in Fall 1975 (137,031) and Spring 1976 (133,692), representing respective increases of 9.8% and 4.2% over 1974-75. In a reversal of the 1974-75 situation, Fall enrollment exceeded Spring enrollment. District Summer enrollment increased 24.1% in 1975 to 42,775; all colleges showed increases, ranging from 2.6% at City to 55.0% at East.

Los Angeles Valley College led the District in total enrollment in Fall 1975 and in Spring 1976, followed closely in both semesters by City and Pierce. This Spring, Mission experienced a 122.6% enrollment increase over Spring 1975, its first semester of operation. Southwest exhibited the largest percentage increase in Fall 1975 (13.9%), and was second to Mission in Spring (19.9%).

A day/evening growth discrepancy was evident in both the Fall and Spring semesters of 1975-76. While 4:30 p.m. has traditionally been the dividing time between day and evening classes, in prior years some colleges used 4:00 p.m. instead. In 1975-76 all colleges appeared to recognize 4:30 p.m. rather than 4:00 p.m. as the dividing time between day and evening classes; the result is that some classes that would have been considered evening in 1974-75 were considered day in 1975-76.

District enrollment in various selected student categories during the last two academic years is presented on page 8 for Fall semesters and on page 9 for Spring semesters. Instructional Television enrollment is excluded from these

comparisons, since the necessary data are not collected on these students. Examination of the data reveals that:

- Day enrollment increased sharply in Fall (14.5%) and Spring (14.4%), while evening enrollment increased only slightly in Fall (0.5%) and decreased in Spring (6.7%). However, the day/evening growth discrepancy cited previously is partly responsible for these fluctuations.
- Male enrollment increased and female enrollment decreased in 1975-76, contrary to the situation in 1974-75. Males constituted almost 60.0% of total enrollment in both the Fall and Spring semesters.
- In a reversal of last year's trend, enrollment of full-time students increased more rapidly than enrollment of part-time students. However, part-time students still comprised almost two-thirds of the District's enrollment in Fall 1975 and Spring 1976.
- Enrollment of students in the sophomore and above categories is increasing at a faster pace than freshmen enrollment, a reversal of the 1974-75 pattern. Sophomores accounted for 28.4% of all students in the Fall and 32.8% in the Spring. Continuing students are increasing more rapidly than are first-time students, also a reversal of the last year's trend.
- Enrollment of students aged 21 and over continued to grow at a faster rate than enrollment of students under 21 years of age in Fall 1975 (10.2% and 5.3%, respectively). In Spring 1976 enrollment of students under 21 declined sharply (-19.2%) and students 21 and over constituted 78.1% of total enrollment.

District Ethnic Enrollment Data

District ethnic enrollment data for the past two academic years are presented on page 10. An important point to bear in mind when interpreting the data is that a student's ethnic status is reported voluntarily. Consequently, fluctuation in the data may be a reflection of differing attitudes towards reporting rather than changes in ethnic enrollment. The percentages of students reporting ethnic status were 64.7% in Fall 1974, 76.7% in Spring 1975, 68.8% in Fall 1975, and 71.2% in Spring 1976.

Analysis of the District ethnic data reveals that:

- Other White (Caucasian) students continue to decline as a percentage of

the student body, although they still represent the largest single ethnic group in the District (52.5% in Spring 1976).

- Black/Negro students remain the second largest ethnic group in the District, comprising 20.4% of the student body in 1975-76. Black/Negro students exhibited the largest growth in the District in both Fall and Spring semesters, a reversal of the declines exhibited last year.
- The percentage of Spanish-Surnamed students (18.0%) has remained the same from Spring 1975 to Spring 1976. They are the third largest ethnic group in the District.
- Enrollment of students in the Native American ethnic group (American Indian) increased from 0.9% in Spring 1975 to 1.2% in Spring 1976, while Oriental/Asian students increased from 5.8% to 6.3% during the same period.

Age Distribution Data

Student age distribution data for the Los Angeles Community College District are provided on page 11. As was the case last year, there has been a decrease in the percentage of students under 20 years of age. Where this group constituted 27.1% of the enrollment in Fall 1973, their percentage had dropped to 20.7% in Fall 1975. However, contrary to the trend in prior years, in Fall 1975 the percentage of students in the 20-24 group increased to 27.7%. The average age of the District's student body surpassed 28 years in Fall 1975 and 29 years in Spring 1976. In Fall 1975, 51.6% of all students in the Los Angeles Community Colleges were aged 25 years or older.

Ten Year Enrollment Comparisons

Ten year enrollment data for the Fall and Spring semesters and four year enrollment data for the Summer sessions are provided on pages 12 and 13. Since 1966-67, total District enrollment has increased 72.4% in the Fall and 71.5% in the Spring. Day enrollment increases in both Fall (115.3%) and Spring (115.9%) have exceeded evening enrollment increases (29.2% and 27.5%, respectively). Since 1972, Summer enrollment has increased 38.9%. Gains in evening Summer enrollment (40.5%)

during that period have slightly outdistanced day enrollment increases (38.1%), contrary to the Fall and Spring trends.

Comparative Enrollment at Other Institutions

Enrollment at the Los Angeles Community Colleges for the past two academic years is compared with that of two and four-year post-secondary institutions in Los Angeles County on page 14 . Total non-LACCD enrollment grew 15.2% in Fall 1975 and 7.6% in Spring 1976, compared to District figures of 9.8% and 4.2%, respectively. All the community colleges in the county showed increases in enrollment during 1975-76, with Fall growth exceeding Spring in all cases but one. The largest increases were exhibited by Antelope Valley Community College, with enrollment there growing 33.2% in Fall and 22.9% in the Spring.

Total enrollment at four-year institutions also grew in 1975-76. But the rate of increase was less than that of the Los Angeles Community Colleges and the non-LACCD community colleges. The universities showed increases of 4.8% in the Fall and 6.2% in the Spring.

Figures released by the American Council on Education indicate that community college enrollment nationwide increased 16.7% between Fall 1974 and Fall 1975. Possible explanations for this increase are: (a) a continued shift of students to relatively inexpensive forms of higher education in light of a depressed economy,(b) increased student financial aid from federal and state agencies, and (c) a heightened interest in technical and vocational programs not normally offered at four-year colleges and universities. Factors specifically influencing LACCD enrollment include: (a) the recent establishment of Los Angeles Mission College,(b) continued recruitment efforts by all colleges, and (c) the

attractiveness of short-term classes.

Weekly Student Contact Hours

Weekly student contact hours are computed by multiplying the number of students in a class by the number of hours that the class meets each week. Thus a class which meets three times a week and contains 10 students produce 30 WSCH. WSCH, like enrollment, is computed as of census day, which is Monday of the fourth week of classes during Fall and Spring semesters and Monday of the second week during Summer sessions. WSCH per student (also known as student load) is computed by dividing WSCH by enrollment.

District WSCH and WSCH per student are presented on pages 15 and 16. Day loads have steadily decreased since 1968-69, a trend that continued in 1975-76. The average day student load was 11.71 in Fall and 11.89 in Spring. Comparable 1968-69 figures were 15.12 and 15.48, respectively. On the other hand, evening class loads have risen during this time; the average evening load was 8.91 in Fall 1975 and 9.20 in Spring 1976, compared to 6.41 (Fall) and 6.61 (Spring) in 1968-69. Summer WSCH per student has increased slightly over the past four years to 13.21 in Summer 1975.

Average Daily Attendance

Like class load, average daily attendance is computed from weekly student contact hours. An important distinction is made in ADA relative to "defined adult" (DA) and "other-than-adult" (OTA) students. Defined adults are students aged 21 or over who are registered for fewer than 10 hours during census week. Other-than-adults are all other students. The importance of the DA-OTA distinction derives from the fact that the two types of students generate different amounts of state apportionment income for the District. (The formulas used to compute

ADA for the two categories differ only in the mathematical constant by which WSCH are multiplied.)

ADA is difficult to compare in different years because computational procedures have changed at irregular intervals. Recent changes have involved adult classes, apprenticeship and short-term classes, non-California resident students, and introduction of a second census week.

Comparisons of OTA and DA average daily attendance are provided on pages 18 and 19. ADA data for academic years through 1974-75 reflect actual yearly total ADA, while the ADA provided for 1975-76 is an estimate. ADA generated by OTAs has traditionally exceeded ADA produced by DAs; however, DA ADA increased more rapidly than OTA ADA between 1968-69 and 1974-75 (40.5% and 31.0%, respectively). The estimated 1975-76 ADA figure of 88,747, represents a 10.3% increase over the prior year.

Enrollment Comparisons: 1974-75 vs. 1975-76

ANNUAL ADA

District Total

Data displayed by individual campus (pages 21 - 142 of this report) have been deleted from this version of the document.

INSTRUCTIONAL TELEVISION

32

INSTRUCTIONAL TELEVISION

Enrollment in Instructional Television (ITV) since its establishment in 1971 is shown on page 145. The observed fluctuations in year to year enrollment are a reflection of changes in programs and in the times they are offered. The large enrollment increase in Fall 1975 (117.4%) resulted partly from two new courses: Search: The Quest for Personal Meaning, and Classic Theater.

The only personal information collected from ITV students at the time of registration is age and sex. ITV students are arbitrarily classified as part-time, day, freshman, and continuing; however they are excluded from District totals of these categories for this publication.

The ITV student age distribution for the past three Fall semesters is presented on page 146. In conformance with the District trend, ITV experienced decreases in the percentages of students under 24.

WSCH and WSCH per student are presented on pages 147and 148. After declining for three consecutive years, Fall WSCH increased 161.8% in Fall 1975 to a record level of 11,655.

Annual average daily attendance is shown on page 149. Contrary to the District trend, DA ADA in ITV has traditionally exceeded OTA ADA.
